Manna From Heaven

Improving the state of rogue AP attacks

Turn your wifi off!

Our intention is to demonstrate our research findings, not to cause any damage. We have taken precautions, but some danger is inherent to such live demos. Please turn off your wifi now if you would not like to be involved. If you decide not to, then you do so at your own risk and we take your continued presence as your consent.

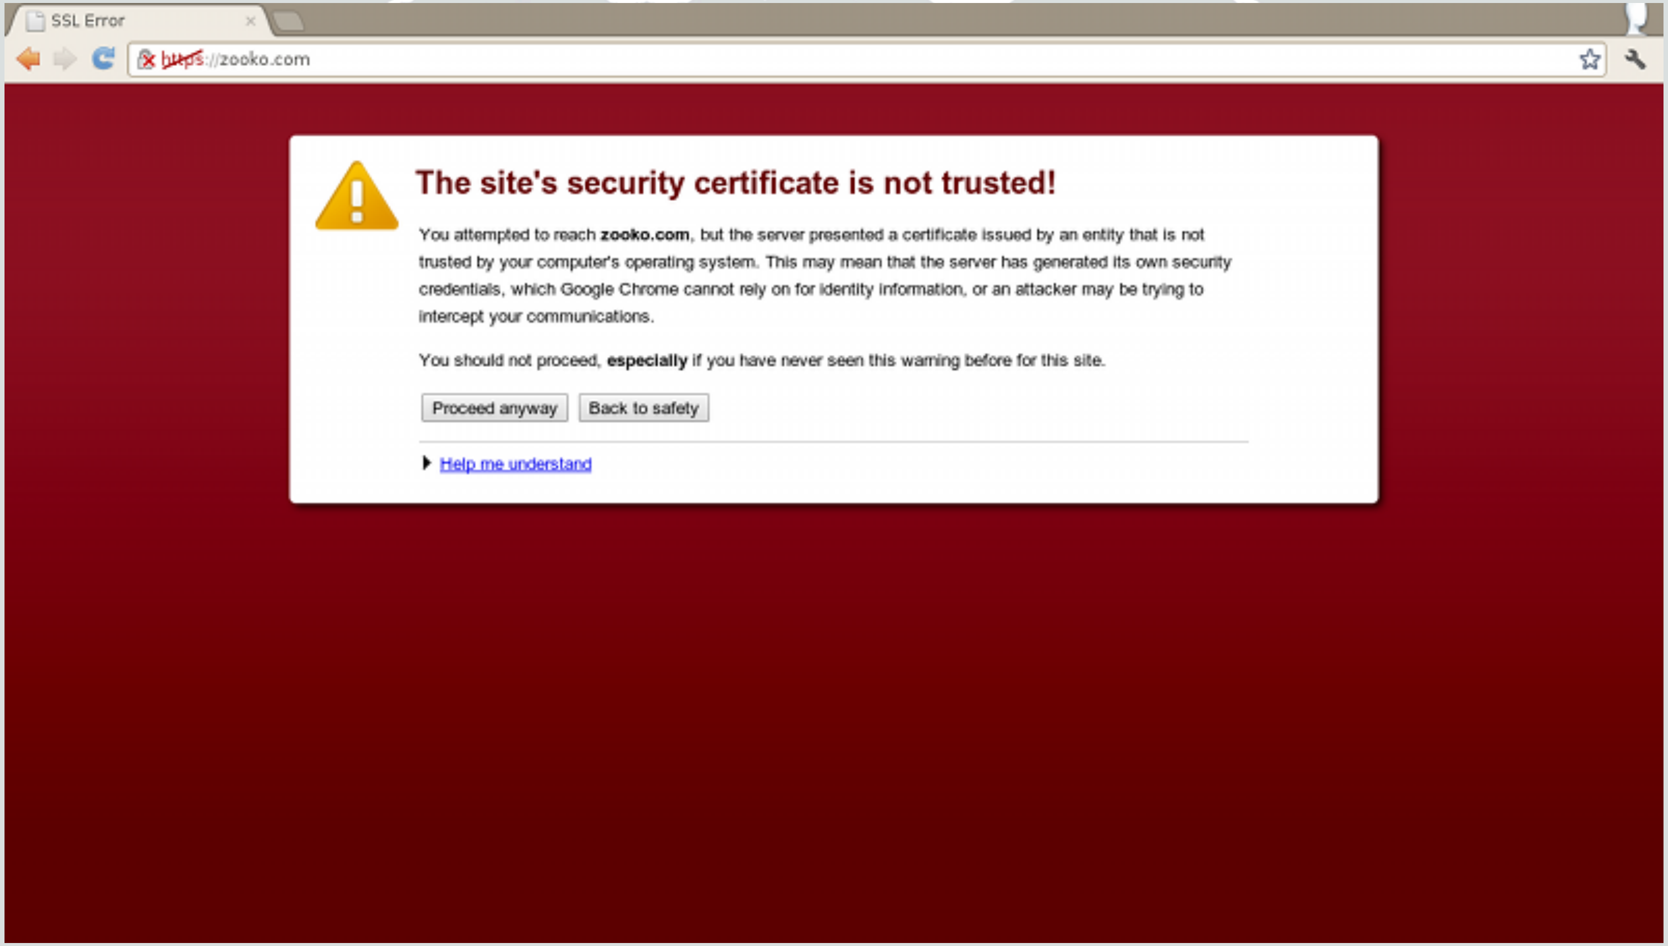
HSTS Partial Bypass by LeonardoNVE



The site's security certificate is not trusted!

You attempted to reach **zooko.com**, but the server presented a certificate issued by an entity that is not trusted by your computer's operating system. This may mean that the server has generated its own security credentials, which Google Chrome cannot rely on for identity information, or an attacker may be trying to intercept your communications.

You should not proceed, **especially** if you have never seen this warning before for this site.
